

**BELGAUM INSTITUTE OF MANAGEMENT STUDIES DEGREE
COLLEGE ORGANIZED “AN INDUSTRIAL VISIT TO PARLE- G
FACTORY, HUBLI ”**

An industrial visit to Parle-G Factory provides an insightful opportunity for degree college students to observe and understand the practical aspects of the industry. This visit offers a firsthand look at the processes involved in the production of various Parle products such as Parle biscuit, chocolates etc. Students gain knowledge about the quality control measures in place to ensure that only the best products reach the market.

The factory's state-of-the-art machinery and advanced production techniques are impressive and demonstrate the integration of technology in modern-day manufacturing. Students also learn about the supply chain management, raw material sourcing, and the importance of maintaining hygiene and safety standards in food processing. The visit highlights the role of sustainable practices in the industry, such as waste management and energy-efficient technologies. The interaction with industry professionals also helps students better understand the challenges and innovations.

Overall, the visit to Parle –G Factory not only enhances the academic learning of students but also provides them with a deeper understanding of the operational and strategic aspects of running a successful food production company. The experience is invaluable for those considering careers in the food industry or related fields. We spend 3 hrs to see the Parle –G Factory . It is a very good An industrial place This visit helped BIMD students and enjoyed lot.
